

# Software Solution Specialist

## About Us

Next Solutions is a fast-growing software development company specialized in RPA, Digital Transformation, and System Integration. We leverage our 13+ years of expertise in the HR industry and help enterprises deliver world-class software solutions that replace complex processes, workflows, and systems with sophisticated, yet intuitive technology.

Following our expansion, we seek to employ a motivated professional for the position of Software Solution Specialist. If you want to be part of a great group of young, smart people who like to have fun and constantly try to get better at their craft, check out our job opportunity below.

## Responsibilities

- Execute the day-to-day activities of implementation engagements for a variety of clients including gathering and analyzing requirements and data, configuring the software, testing the solution, and training the client
- Communicate with account managers and business analysts for gathering customer requirements
- Be responsible for maintaining the quality of the customer yearly implementations
- Identify and communicate findings (such as process recommendations, issues, bugs, risks, etc.) to the project manager and/or development teams
- Elaborate the appropriate documentation when necessary

## Requirements

- Good knowledge of MS Excel and CSV format
- Excellent English knowledge (spoken and written)
- Excellent communication skills
- Strong attention to detail
- Writing business documentation skills

## Advantages

- Software Implementation/ Integration experience

- Experience in testing Web-based applications
- IT-related bachelor's or master's degree
- Knowledge of relational databases and SQL
- Experience with HR, Payroll, or ERP systems

## **Personal Profile**

**Our ideal candidate has the following qualities:**

- Thrive in a team environment and work well with others
- Skilled at evaluating options and gathering solutions
- Ability to prioritize and organize tasks
- Dynamic, results-oriented problem solver
- Motivation to improve the quality of products and services

## **The Good Stuff:**

- Attractive compensation package - competitive salary & social benefits
- Continuous learning and coaching.
- Friendly and casual work environment.
- Healthy and not so healthy drinks and snacks in the office
- Work-life balance - regular team buildings and celebrations
