

Omega Coders Academy

PHP Developer Trainee

Omega Coders is an international IT company specializing in web development that combines powerful and cutting-edge technologies. We strive to employ the best people and deliver the best quality product to our clients.

Our next step is to give some knowledge back and extend a hand to all future web developers that want to tap into the vast world of PHP and learn how to successfully navigate the IT currents.

Starting July 25, 2022, for a duration of 4 weeks:

You can:

- Learn and apply fundamental programming concepts
- Gain experience in organizing your work and communicating with colleagues
- Complete a polished web project to include in your developer portfolio
- Build a professional network of experienced developers and fellow students
- Turn this opportunity into a paid internship or a full time position at the company

You need to:

- Be motivated and ready for a challenge
- Be communicative and willing to learn
- Have a good level of English language proficiency
- Understand basic programming concepts (variables, control structures, syntax)
- Prior knowledge of PHP, MySQL, GIT will be a bonus
- Be in your 3rd or 4th year of university studies or interested in a new career path

What we offer:

- Participation in the Academy is **free of charge**
- MacBook Pro issued for every participant for the duration of the training
- Modern office in the Sofia city center (compliant with Covid-19 regulations)
- Take part in the social life of our office - enjoy activities together with us - lunches, board games, barbecues and more...

Go to academy.omegacoders.com and apply before July 15!
