Junior C++ Engineer

/ The role:

The C++ developers maintain our trading/research capabilities in global markets and innovate how we do them. Some of the most common tasks and projects may include onboarding of new market feed or curating of existing one to a specific trading strategy, following crucial guidelines such as - small latency during live trading and prevention of data loss.

Main tech stack: C++ 20, Linux

/ Your contribution and responsibilities:

- Designing, developing and optimizing multithreaded systems using C++
- Integrate the system with other services and databases using rpc or rest apis
- Assist traders developing trading strategy
- Maintaining, enhancing Backtest simulator
- Exploring big-data infrastructure for research

/ Our ideal teammate has/is:

- Minimum Bachelor's in Computer Science, Computer Engineering or equivalent
- At least 1 year of experience programming in modern C++ (11,14,17,20)
- Ability to write sizable applications and manage complexity
- Good algorithmic and problem solving skills
- Effective communicator and decision maker

/ Brownie points:

- Participated in competitive programming contests
- Knowledge of automated trading system
- Familiar with Linux kernel
- Experience with hardware development (e.g. NIC, video card etc.)

/ How to apply:

If you recognize yourself in this role, please send your CV in English to careers@questers.com

Our super recruiter team would be excited to get in touch if your skillset and experience match the profile we look for. Of course, all applications will be treated as strictly confidential.

Here at Questers, we hire great people. No matter how you identify and where you're from, you can belong here. What's most important to us is having an inspiring, dynamic team who live our values of collaboration and excellence every day. And we're completely committed to fostering an open, supportive and inclusive culture where everyone can focus on just being themselves while also reaching their full potential.
