

QA Engineer

We need a mixture between QA and Business analyst, to join our development team and establish the Quality Assurance division.

Responsibilities:

- Analyze requirements
- Test planning
- Design test cases based on the analysis
- Document test results
- Bug reporting
- Participating in and optimizing the QA process
- Lead the newly joined QA Engineers in the future

Requirements:

- 0.5+ years of experience in Quality Assurance
- Experience with specification analysis
- Experience with writing test cases and scenarios
- Experience with Bug tracking/project management tools (e.g. GitHub Issues, JIRA, Meistertask, YouTrack etc.)
- Strong logical skills
- Willingness to learn and develop in the field of test automation
- Experience with Version Control (e.g. Git)

Additional:

- Knowledge of development methodologies
- Interests in web development
- Experience with build automation
- To feel comfort with SoftUni's product(s)

Our offer:

- Challenging and interesting projects that will change the software industry in Bulgaria
- Membership in a dynamic team where creative ideas and innovative approaches are appreciated
- Competitive remuneration
- Flexible working time
