

# FidWeb

**LOOKING FOR NEW TALENTS**

Mercedes-Benz  
Research & Development North America, Inc.

# WHAT DO WE DO?

## TEAM

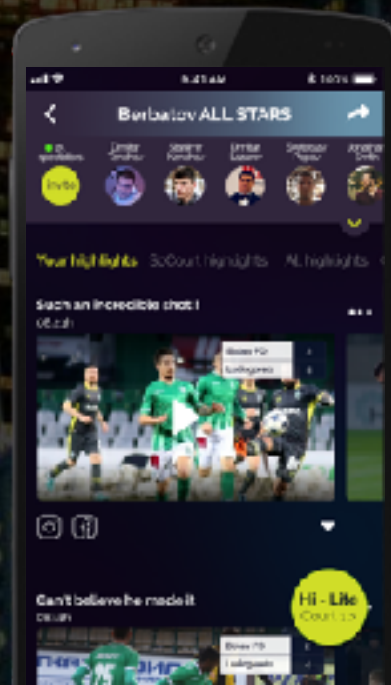

The Fidweb team consists of multidisciplinary talents – software engineers, development experts, digital design and hardware geeks

## CAPABILITIES

- Mobile apps
- Web apps
- Data management
- UI / UX design
- Integrations
- Brand identity
- Illustrations

## PORTFOLIO

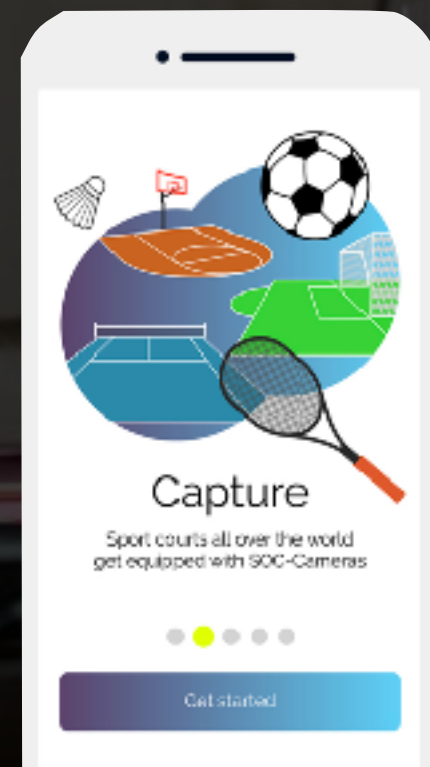

We work on our in-house built and managed products, but we also extend IT departments of the most innovative companies – no matter if startups or already established enterprises

# ON-DEMAND OUTSOURCE IT

DUE TO GREAT TEAM CAPABILITIES AND HIGH DEMAND ON THE MARKET, WE STARTED WELCOMING OUTSOURCING PROJECTS. WORKING WITH A FEW CLIENTS AT A TIME FOR THE PURPOSE OF BRINGING ONLY THE BEST OR NOTHING, WE FORM ONE TEAM WITH OUR CLIENTS AND HELP THEM BUILD A STRONG DIGITAL FRAMEWORK EARLY ON.

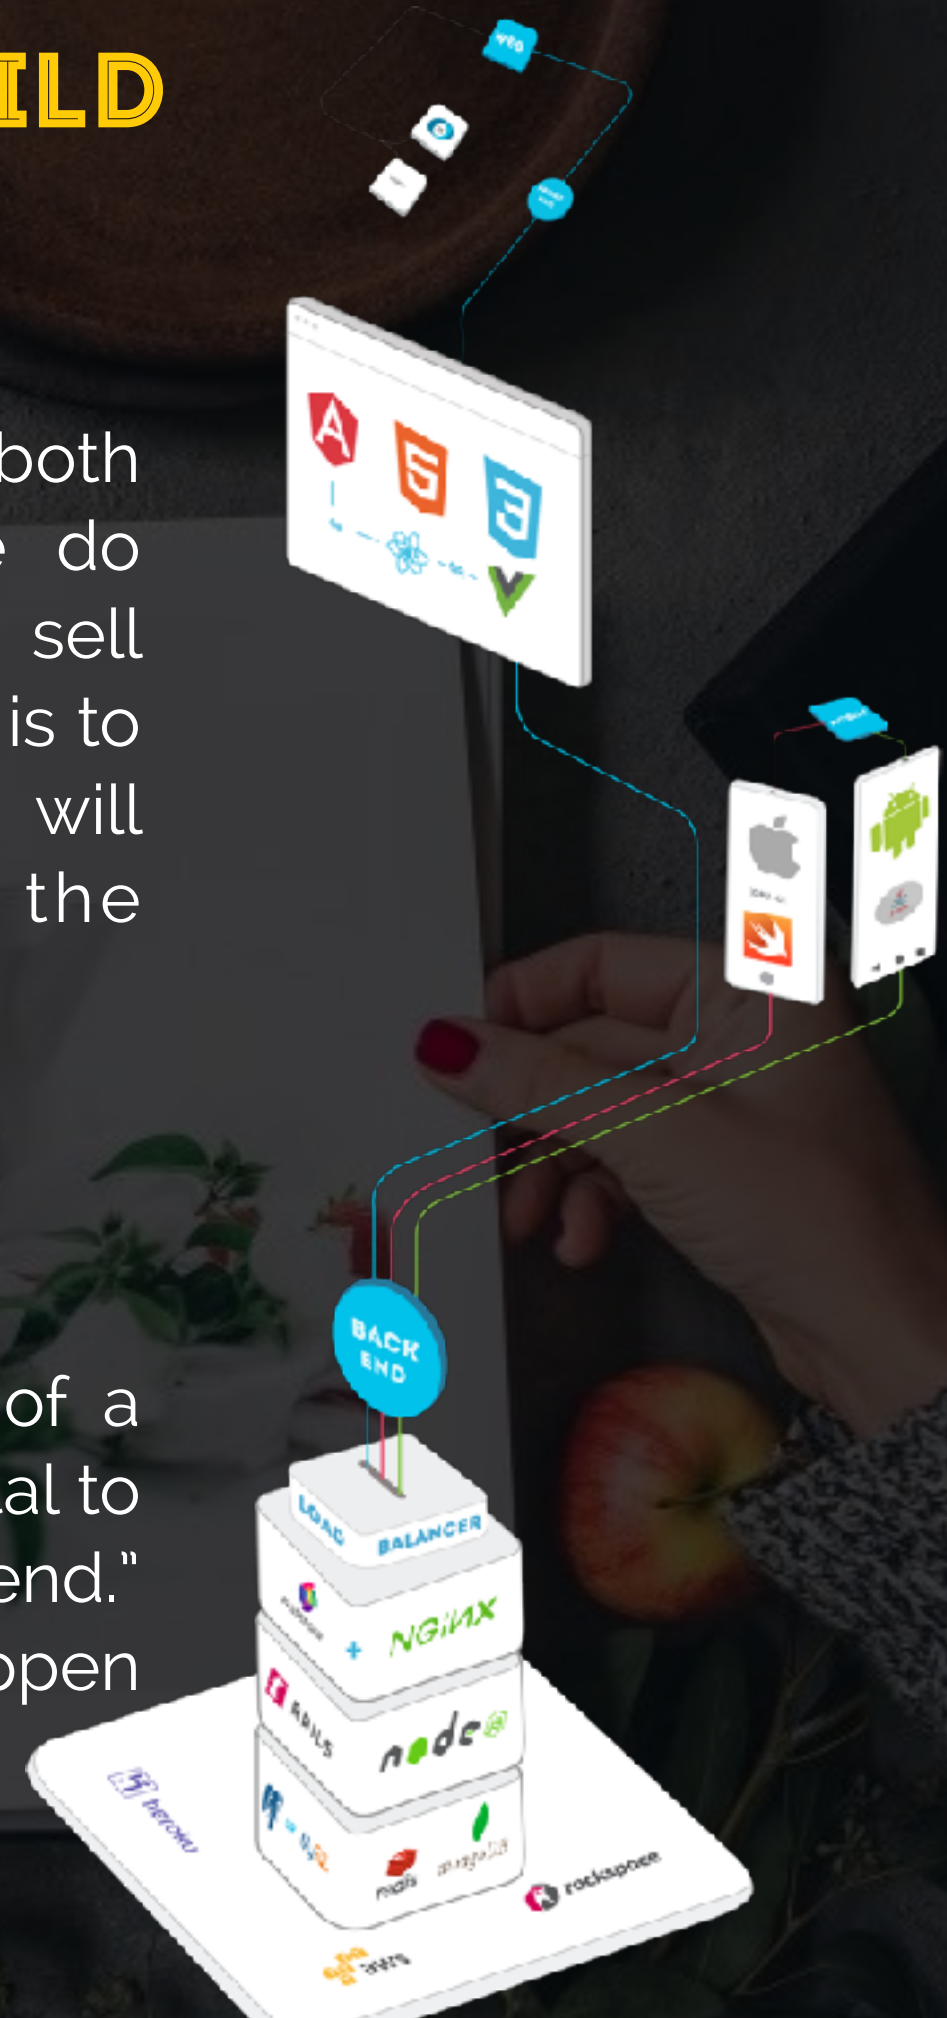

# WHAT DO WE BUILD

## FRONT-END

Front-end / client-side development requires both aesthetic sensitivity and programmatic rigor. We do make things look good, as good-looking things sell better. The goal of the Fidweb front end developers is to create clear, easy, fast pages and interfaces that will make people understand and care about the information.

## BACK-END

Software applications seem like icebergs – parts of a program may not be visible to a user, but they are vital to any system. This is the elusive and mystical “back-end.” The Fidweb back-end developers make all this happen in a way you will love.

# PORTFOLIO

The first ever all-in-one product for capturing and sharing hi-lites from sports events
