About us:

Bulwork is the first IT & TELCO recruitment agency in Bulgaria with more than 18 years stable presence in the market. The company has established a reputation of delivering high quality services both to clients and candidates. We respect the wishes of our clients and candidates and strive to provide the best service by finding the most suitable and challenging job opportunities for them.

Our client:

It is a fast-growing technology company with focus on Enterprise Collaboration, Cloud, Big Data, IoT, Enterprise Mobility and Outsourcing. It has offices in several countries and clients among Fortune 500 IT companies.

Due to building **a whole NEW team to support cloud-related projects** for a global partner of them, together with our client we are urgently looking for Junior, Middle and Senior level:

TECHNICAL SUPPORT ENGINEERS (CLOUD PLATFORMS)

Responsibilities:

As part of company's cloud support team, you must enable 24h/7 availability of operations, performance, and capacity of the Cloud Platform Services. You should coordinate incident management across the layers and development teams as well as solve incidents, drive and implement automation and develop central tools. Last but not least – you will support development teams to automate the application lifecycle through build, test, stage and deploy by using DevOps and Continuous Delivery/Deployment best practices.

Sounds challenging?

Main requirements:

- At least 1 year of experience in software development or operations;
- Experience in technical support or database administration;
- Understanding and / or some basic experience with cloud technologies and related processes;
- Experience with Linux OS;
- Readiness to work in shifts (24x7);
- Good command of English language (both written and verbal);
- Service and customer oriented professional.

Advantages:

- Experience with operating systems in the cloud;
- Expertise in analyzing and troubleshooting large-scale distributed systems.

The company offers:

  - Excellent remuneration package;
  - Additional health insurance;
  - Initial technical training;
  - Participation in all stages of the development process (from architecture design to development using SCRUM methodology);
  - Professional growth and development;
  - Additional trainings and coverage of certification program expenses;

- Opportunity to work as part of a top performing technology company and a chance to join a completely NEW team;
- Excellent opportunity to get ahead in your cloud career.

If you are passionate about cloud and you are looking for **improving your cloud computing skills further**, do not hesitate anymore but apply today. Please send us your application (CV) in English directly at:
