

Internship with included mathematical algorithms training

Chaos Group is a worldwide leader in computer graphics. Our technology helps artists and designers create photoreal imagery and animation for design, television, and feature films. We're shaping the future of creative storytelling and design with our research and development in material scanning and virtual reality. V-Ray, our Academy Award-winning renderer, is at the heart of our product portfolio and works seamlessly within leading 3D software.

Do you want to join our team of curious, analytical and driven Agents of Chaos?

We are embarking on a search for talented young professionals to join our Chaos Camp.

What we offer:

- Intensive 3 months free of charge training focused on mathematical algorithms
- Training starts on 18th November, 2 times per week from 18:00 till 21:00;
- The opportunity to develop fundamental knowledge of a wide variety of algorithms;
- The best performers during the course will have the chance of becoming part of Chaos Group and continue to develop their knowledge and career within the company.

What do you need to successfully complete Chaos Camp?

- Interest in mathematical algorithms;
- Passion to learn new things;
- Willingness to meet new challenges.

Don't miss the chance to send your application to careers@chaosgroup.com until the 13th of November.

Only short-listed candidates will be contacted, via e-mail or phone.
Confidentiality of all applications is assured.
