

# Senior .NET Web Developer

## Job description

We are looking for a motivated, talented and highly productive .NET/C# web developer to join our highly skilled team of successful professionals.

The ideal candidate will participate in the implementation of large and notable web projects and solutions, in a variety of sectors, such as large e-commerce and travel sites, intranets, news portals or other large-scale web applications, for the private and public sector. He must be able to work in a fast paced and challenging environment utilizing the latest web technologies to achieve outstanding results.

## Desired Skills and Experience

### What you will be doing

- You will join a team of seasoned web professionals working on ambitious and challenging web solutions
- You will utilize your programming skills to materialize the product's vision into reality
- You will collaborate with and consult project managers and HTML authors to achieve technical correctness of each project
- You will utilize our in-house developed Web Content Management system and contribute to its development with ideas from hands-on experience with it
- You will be technically responsible of the projects you take on and choose the best method or technology to make them successful

### What we will expect from you

- You are proficient and highly productive with ASP.NET, C#, MVC, Entity Framework, JavaScript, Ajax, jQuery, SQL Server and Web Services
- You have at least 2+ years' experience in ASP.NET web development in C#
- You have a bachelor's degree in Computer Science or equivalent, or proven track record of previous web projects of significant complexity
- You have database design, programming and optimization knowledge on MS SQL Server
- You have experience with client side programming either by using a client framework or by plain vanilla JavaScript, (*familiarity with Angular and/or React will be considered a plus*)

- You have participated in at least 2 large web projects
- You are familiar with Web Content Management concepts
- You are familiar with HTML5 and CSS3
- You have solid communication and team working skills
- You have strong written and verbal English communication skills
- You cannot resist the urge to continually learn and improve
- You have excellent time management skills
- You pay attention to detail without sacrificing efficiency
- Greek communication skills will be considered an asset

**Benefits**

- In-house training & education
- Paid training
- Attendance to conferences and events
