

MA IN LANGUAGES AND PUBLICITY. PHILOSOPHICAL AND SOCIOLOGICAL APPROACHES (TAUGHT IN BULGARIAN)

Brief presentation of the program: The program is interdisciplinary in nature. It is available in two areas - philosophy and sociology. The general characteristics of the current state of both philosophy and sociology are the wide range of thematic orientations, research methods and categorical languages. This diversity includes even the most common questions about the subject, cognitive tasks and social functions of philosophy and sociology. Growth of pluralism is a common development trend in both studies. In the whole range of philosophy and sociology today, however, the issue of language remains one of the important fields of intersection between the two sciences. The program offers specific research profile insofar students are introduced to contemporary philosophical and sociological approaches to the analysis of language, and are involved in practical research of public uses of language in Bulgaria

Major and qualification:

Specialization: Philosophical aspects of the public use of language

Qualification: Master in Philosophy

Specialization: Sociological analysis of public use of language

Qualification: Master in Sociology
